Hi Becki - thanks for the call. I have not yet received a resending of the email with attachments.

Thanks

Greg

All,
Please see this new info from Chris Weis. I understand Greg may have gotten this through other channels. We may want to talk tomorrow.

Quite a bit of info compared to MCHM but still very sparse.

Looks like EPA (Oscar Hernandez) requested an OECD assessment that's informative.

Chris,
I am at a conference in New Orleans and just saw your message. I think others on the EPA review team may have gotten the same request through other channels, but I will check with them. There isn't a lot to go on, is there?

Becki,

I thought you should see this emerging information from the Elk River Spill. If you could share it with the EPA review team, I would appreciate it.

Thanks,

Chris

MSDSs attached .as discussed Chris. Please give me a call if you have thoughts .note the LD50 and some comments on cancer info.

Thanks again,

Vik

Please see below from EPA R3.

Ed, can Larry and your group review the tox info on this additional chemical for our internal purposes as soon as possible?

We can discuss this at our 4 pm with Robin and determine how to discuss with the state. I am sure at least their environmental state folks are also aware of this now too, and we can expect the health folks to ask our opinion soon is my guess.

Subject: Additional chemical was in Tank 396 with the MCHM that was leaked

Good morning,

During the 10am meeting with Freedom Industries this morning we were told that there was a mixture in Tank 396, instead of just MCHM. The mixture was approximately 5.6% of the PPH which can be found in the attached MSDS sheet from published by Freedom Industries. The PPH is a combination of the two products from DOW which are also attached to this email. Approximately 300 gallons of the PPH with 6251 gallons of MCHM for the total release (including what is still in the soil and what made it to the river).

Thanks,

Melissa Linden
